CITYCROP™

AUTOMATED INDOOR FARMING

“Grow your own food at home with just a click of a button!”

Company Profile

CityCrop is a system that automatically grows food and medicinal plants. We like to think of it as a beautiful mini fridge that stocks itself with high-quality food.

The CityCrop unit also takes care of automatic nutrient dosing, ph balancing, temperature control, humidity control, and odor neutralization. CityCrop is smartphone-controlled, so you can grow from anywhere.

We partner all of that with a beautiful design that allows CityCrop to fit perfectly in any home.

At CityCrop, we aim to make growing high-quality, pesticide-free cannabis, vegetables, and herbs easy for anyone and everyone, regardless of experience.

norbloc

“The premier blockchain KYC platform”

Company Profile

norbloc, was founded in 2016 and builds enterprise regulatory technology applications on blockchain platforms. Its flagship product, Fides, is a revolutionary KYC (‘Know – Your-Customer’) platform using an underlying technological structure founded on permissioned distributed ledgers (blockchain) and proprietary design distributed databases. Fides can achieve significant savings for participating financial institutions on their current cost – base, while also enormously enhances the customer service and experience offered to participants’ client base. Designed to digitize customer KYC profiles and simplify compliance process allowing GDPR compliant sharing of validated customer data and monetization on KYC services among financial institutions and market participants.

“VR SOLUTION FOR SURGICAL REVOLUTION”

Company Profile

The vision of ORamaVR (www.oramavr.com) is to transform medical education (knowledge) and training (skills) of surgeons, through innovative virtual reality simulation and skill transfer from the virtual to the real operating room, reducing errors and improving patient outcomes. To realize this, we have created our deep, unmatched proprietary, psychomotor, gamified and multiuser VR software platform. ORamaVR has been awarded in 2018 the prestigious FARE award, together with NYU, from the American Association of Hip and Knee Surgeons as well as the second prize in the 8th Innovation & Technology Competition organized by the National Bank of Greece.

“OVIVIEW -HR Business Tool-”

Company Profile

Professionals are able to pre-screen applicants through customised video pitches before an actual interview. It eliminates costs, time and distances!

OVIVIEW -which stands for “Online Video Interview”- is a truly innovative platform that delivers both convenience and effectiveness into the recruiting routine that makes hiring simpler, convenient and more efficient. OVIVIEW offers the chance for easy and quick initial screening of candidates using cameras to record each interview while avoiding the need for simultaneous participation and making the whole interviewing process simpler, objective and more effective.

**PLANT
BOX**

“Gifts from Nature”

Company Profile

Our innovated company, PlantBox, produce, grow, and distribute, high quality and aesthetically formed miniature trees and plants, attractively packaged for the retail market.

Combining family knowledge with modern horticultural methods, innovated techniques and ideas, we've used as a base a tree with global symbolism, the Greek Olive Tree, and we've created a unique Plant attractively Boxed for the retail market.

Our plant can be delivered safely, fast, with low cost, to all over the world directly from Greece.

We aim to transform the retail plant sector, opening new opportunities outside the traditional channels.

“Unlocking our Mind”

Company Profile

The UoM Robotics Academy was founded in the vision to transfer the results of international research and emerging Robotics programs to society. The ultimate goals are to increase the applicability of social robots and to acquire learning in an experiential and playful way and inspire everlasting love for learning.

Our expertise on the multifactorial and cross-disciplinary nature of designing and developing social robots applications, coming from our academic and applied research record in the field, combined with our experience with actual prototypes in pilot or large-scale applications guides our efforts in the Educational and the Social Robotics.
