Co-working spaces

Co-working spaces are offering cheaper alternatives to offices for bootstrapping startups and accompanying services such as the network of people and connections inside the community. Some of the most well-known co-working spaces are the following:

✓ The Cube
✓ Found.ation
✓ Orange Grove
✓ Impact Hub Athens
✓ Stone Soup
✓ Romantso
✓ HIGGS

Incubators, Accelerators

Accelerators and incubators are important parts of every startup ecosystem, but the distinction between the two is often unclear. In Greece, there are only a few accelerators that act strictly as so, and the same goes for incubators as well. Incubators usually support startups at their early stages, while accelerators aim to advance their growth and are time specific. Below is a list of the most important organisations of Greece:

- Metavallon
- Startech Ventures
- Venture Garden
- Stage Two
- Iqability
- EGG (enter•go•grow) by Eurobank
- Corallia
- Technology Park “Lefkippos”
- Thessaloniki Technology Park
- VIVA Nest
- Athens Digital Lab
- Innovathens
- Athens Centre for Entrepreneurship and Innovation (AceIn)
- The Athens Startup Business Incubator (Th.E.A.)

Equifund: a fund-of-funds to support innovation and SMEs

A new fund-of-funds programme, created by the Greek ministry of Economy and Development in cooperation with the European Investment Fund (EIF) to provide small and medium-sized enterprises (SMEs) with the private equity and venture capital ecosystem they need in order to thrive.

EquiFund aims to strengthen the venture capital market in Greece, to provide entrepreneurs with the crucial financing they need to grow their businesses (and attract private sector investment).

Its goal is to attract private investment at all stages of entrepreneurship, from start-ups to mature expansion companies.
Equifund was launched with:

- **200 million euro** from European and national funds
- **60 million** from the European Investment Fund
- **40 million** from the European Investment Bank European Fund for Strategic Investments, the core of the so-called ‘Juncker Plan’ and
- another **100 million** is calculated to receive from other private investors.

In total, **500 million euro** is expected to be deployed in the **period 2018-2023 in venture capital investing**

From the **€215m** available in the Innovation and Early Stage Windows, only **€13m** approx. have been invested so far.

Another alternative source of funding is the EU Horizon 2020 project which includes ICT actions of €9 billion.

The Digital Single Market – one of the EU’s priorities – holds out significant prospects: it is expected to have a beneficial impact, both directly, through infrastructure investments totalling €21.4 billion, and indirectly, as according to estimates, the Digital Single Market should contribute €415 billion per year to the European economy.

Source: NBG, Survey of Greek SMEs: IT clusters and tech startups
The ICT priority area will mainly be supported by electronic infrastructures (e-infrastructures) targeted to:

- Effective support for research & innovation-driven needs for "big computing" and "big data"

- Support other high added value sectors such as life sciences, with special requirements to computing resources (capitalizing and reinforcing cores of excellence and reinforcing background knowledge and innovation in bioinformatics, bio-imaging etc.)

- Promotion of cultural heritage, the arts and humanities, through development of virtual infrastructures that leverage and expand content management technologies, interoperability of digital repositories and language technologies and applications
